

# Winter School on Responsible AI: Data Science meets Law

January 10-13, 2023 | The Dead Sea, Israel

Whether you are a law student or one coming from data or computer science, and you want to:

- ✓ Gain practical knowledge about “Responsible AI” relevant to your research and professional career
- ✓ Learn how to spot ethical issues throughout the life cycle of AI systems
- ✓ Engage with students from diverse disciplines
- ✓ Network with senior professionals in the field of AI

Join fellow students interested in Responsible AI in the serene scenery of the Jordan Valley & overlooking the Dead Sea

The international winter school on Responsible AI will allow graduate students in data/computer science or law (and other closely related disciplines) to tackle ethical challenges of contemporary AI-based technologies. Engaging in “hands on” activities, students will be given a unique opportunity to use their skills in a collaborative and cross-disciplinary effort to analyze and address ethical issues with AI systems. We will cover diverse aspects of embedding human values in AI systems, such as fairness, privacy, transparency & explainability, accountability, policy and regulation.

**Previously the winter school was offered as an academic course around the globe in leading institutions such as: Cornell Tech • Boston University • Bocconi University • the Technion • Tel-Aviv University and University of Haifa.**
